Family Law

The nucleus of the family has changed over the years and evolved to accommodate our changing social environment. The Family Law Practice Group has a broad range of experienced attorneys who provide professional advice concerning contested and uncontested divorces, annulments, property settlement agreements, prenuptial agreements, support, custody and parenting time, visitation disputes, domestic violence actions, paternity litigation, domestic partnership issues and adoption proceedings. Our attorneys are also experienced in assisting families with adoptions and the creation of guardianships.

As always, we are advocates for our clients at every stage of the proceedings, whether in settlement, mediation or trial. Through our tax practice, we provide tax advice as it relates to family law issues.
