Non-Profit Organizations

The law and regulation of non-profit organizations has become more complex in recent years due, in part, to the increased scrutiny of all forms of business entities. The DiFrancesco Bateman Non-Profit Practice Group has the experience and background to be able to meet the needs of non-profit organizations with regard to management, oversight and taxation. Attorneys in the practice group have served on non-profit boards, formed and managed non-profit organizations, and provided advice on all aspects of these organizations. We routinely apply to the IRS for 501(c)(3) status for charitable organizations. We are also able to rely upon participation and feedback from partners and associates with extensive experience in other areas pertinent to non-profit management, including health care, employment, finance, litigation and taxation.
